Office Action Summary

Art Unit: 3732

### **Rejections based on Prior Art**

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 4, 6, 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Branford (5,030,098) in view of McCarty, Jr. (5,374,237).

Branford discloses a vibrator mouthpiece having a housing 1, on/off switch ("activating means") and a flat solid arch shaped mouthpiece 2.

In regard to claim 1, Branford discloses little regarding the vibrating mechanism, but does illustrate a unit 1 having a power cord. McCarthy teaches the use of batteries for a similar vibrator mouthpiece. To have used batteries to power the vibrator in view of McCarty, Jr. would have been obvious to one of ordinary skill in the art. Additionally, it is unclear if the Branford mouthpiece 2 meets the two to five millimeters thickness limitation of claim 1. One of ordinary skill in the art would have found the selection of a thickness within the claimed range for the manufacture of the Branford device obvious.

In regard to claim 4, note element 4 which could be interpreted to be part of the broadly defined housing structure.

Art Unit: 3732

In regard to claim 6, the opening in housing 1 through which element 4 (here considered to be part of the mouthpiece) extends is considered to be the broadly claimed "slot."

**Prior Art**

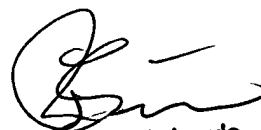

Reiss (1,826,434) is made of record.

**Allowable Subject Matter**

Claims 3, 5 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
